SOUTHERN ILLINOIS 211

INTRODUCTORY NOTE

This handbook is the sixth edition of a book first published in 1970 by the Department of Business and Economic Development as a general reference for use by those interested in business or industrial planning and investment in areas of the State of Illinois.

The tables in this 1978 edition represent the most recent and suitable data available. Some revisions of historical series (shown in earlier editions) have been made due to the availability of improved data, and some new material has been added.

The material in the book is presented in two parts, the first of which includes statistical information pertaining to the economy of the entire State (with some regional comparisons). The second part presents regional economic data separately for each of the nine regions established for the purposes of the book (see map on page 5).

In the tables shown in the book, details may not add to totals due to rounding. In the columns of the tables, unless otherwise indicated, hyphens represent zero, NA indicates data not available or not applicable, and (D) indicates data withheld to avoid disclosure of the operations of individual firms.

STATEWIDE SUMMARY

The Department of Business and Economic Development estimates Gross State Product on both an annual and quarterly basis, and the annual estimates are herein presented for recent years through 1978. The method used in making the estimates rests on the development by the U.S. Department of Commerce of estimates of Gross National Product by industry, and the application of comparative U.S. and State nonfarm earnings data published by Commerce, along with farm income data for the State published by the U.S. Department of Agriculture. GSP data are shown first in the Statewide section.

In addition to the Gross Product tables, tables showing Total Personal Income for the State, with regional comparisons, are presented. Total Personal Income is the current income (for the year given) of persons in the State from all sources. It is measured before deductions of income and other personal taxes, but after deduction of personal contributions to Social Security, government retirement, and other social insurance programs. It includes income received from business, Federal and State and local governments, households and institutions, and foreign countries. It consists of wages and salaries (in cash and in kind and including tips and bonuses as well as contractual compensations), various types of supplementary earnings termed "other" labor income (the largest item being employer contributions to private pensions and welfare funds), and the net incomes of owners of unincorporated businesses (farm and nonfarm), including the incomes of independent professionals, net rental income, dividends, interest, and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently, such as unemployment benefits, Social Security payments, and welfare and relief payments).

Following the Gross Product and Personal Income tables in the Statewide section, materials are presented relating to the State's manufacturing sector and indicative of the pattern of trade in manufactures, agricultural and mineral production, the transportation network, employment and wages, population, and state and local taxes related to personal income.

REGIONAL DATA

As in earlier editions, graphs are presented in this book to depict secular trends in the components of the economic base in each region of the State. Data used for preparation of the graphs derive from county personal income estimates (see preceding page) prepared and supplied by the Bureau of Economic Analysis, U.S. Department of Commerce.

The components of the economic base represent levels of personal income derived largely from sources outside the area for which they are shown--through the sale of local products and services to the rest of the State, nation or world (and to visitors who come from these outside areas), or through the location in the area of facilities (such as a University) or the local impact of programs (such as Social Security) which are funded on a Statewide or nationwide basis--and which enable the local community to "import" from the rest of the State, nation or world the many goods or services which it needs but does not produce. These levels of income (called basic income), when circulated in the local economy, create roughly an equal level of additional (non-basic) income, largely in trade and various services. The economic base is therefore significant to business or investment planning because, over time, it is the bellwether of total community income and economic activity.

In addition to the materials relating to general economic trends, for each region materials are presented relating to the manufacturing, agricultural and mining sectors, transportation, employment and wages, population, retail sales, housing permits, and municipal finances.

For additional information related to the data presented in this book, contact the Illinois Department of Business and Economic Development, Office of Research, 222 South College, Springfield, Illinois 62706 (Area 217: 782-7500).

*In this table, data are not shown separately for any industry which does not have at least 100 employees or 10 reporting units in the State. However, data for an unpublished industry are included in the total shown for the broader industry group of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry are included in the tabulations in a broader kind-of-industry group.

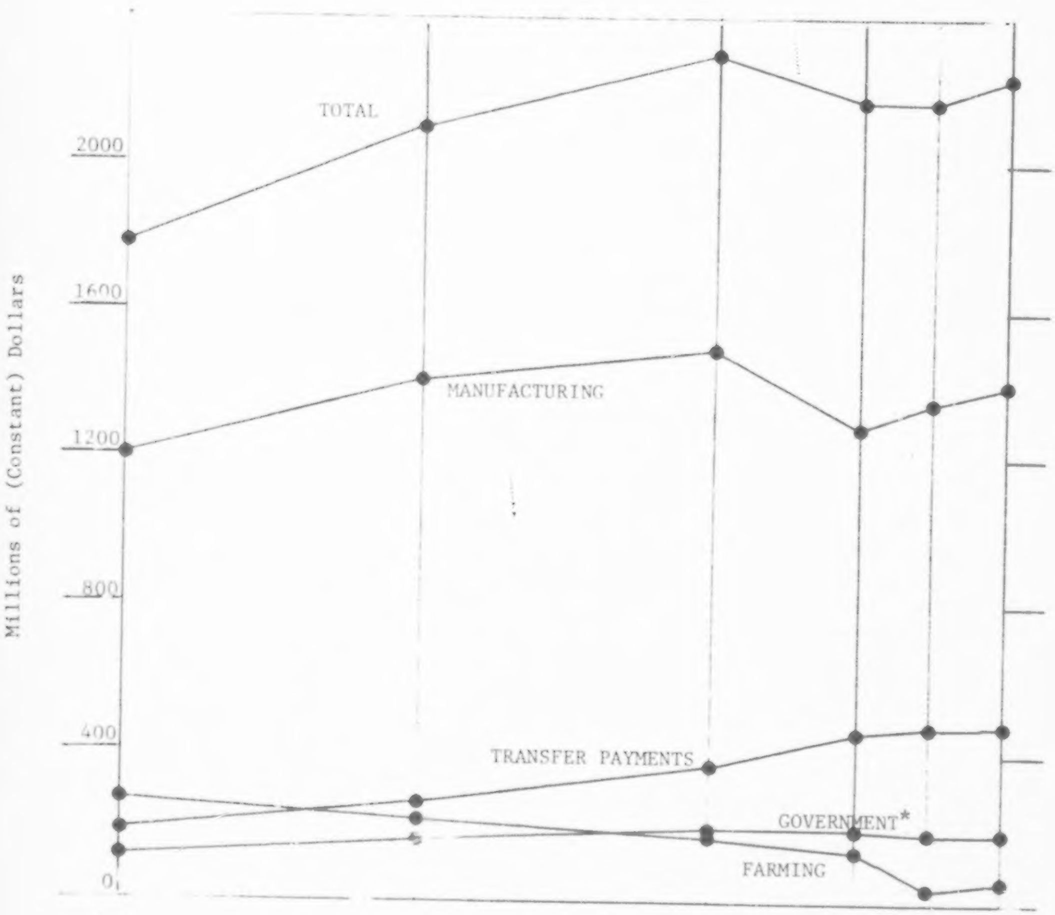
NORTHWEST ILLINOIS

PERSONAL INCOME COMPONENTS OF THE ECONOMIC BASE, IN CONSTANT, 1977 DOLLARS



*The values indicated for asterisked components represent only that portion of total personal income from the component which is estimated to be income derived from outside the Region. See Introductory note, page 3.

In addition to the components shown above, Property Income* contributed nearly $100 million to the economic base in 1977.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

CENTRAL ILLINOIS - MINERAL AND AGRICULTURAL PRODUCTION

Minerals Produced in Order of Value, by County, With Quantities Shown for Coal (short tons) and Petroleum (42-gallon barrels)*	(total value of minerals products) 1962 (000)	1976 (000)
Cass - none reported	$10	NA
Christian - coal (3,278,065), petroleum (314,700), stone	NA	NA
Logan - sand and gravel, stone	693	NA
Macon - sand and gravel, petroleum (14,900)	NA	NA
Macoupin - coal (3,257,007), stone, petroleum (6,700)	1,293	NA
Menard - stone	NA	NA
Montgomery - coal (1,784,478), stone, petroleum	NA	NA
Morgan - none	--	--
Moultrie - petroleum, sand and gravel	NA	NA
Sangamon - sand and gravel, petroleum (172,700), stone	969	NA
Scott - stone, clays	344	NA
Shelby - petroleum (46,200), sand and gravel, stone	NA	NA

Agricultural Production

	1965	1977
Crop production (bushels)		
Corn (for grain)	135,400,200	183,235,500
Soybeans (for beans)	33,297,800	57,755,300
Wheat	12,616,100	10,496,800
Oats	2,622,800	1,053,900
Livestock inventory (no. head on farms)		
All Cattle	375,300	317,300
Milk cows (two years old and over)	23,400	9,600
Beef cows (two years old and over)	107,800	99,100
Hogs	799,600	709,400
Stock sheep	53,500	20,800
Milk production (thous. of lbs.)	175,300	101,800
Egg production (thous. of eggs)	169,506	73,900

---

*In some cases single quantities were reported in the sources for two or more counties. In these cases the quantities have been divided equally among the two or more counties.

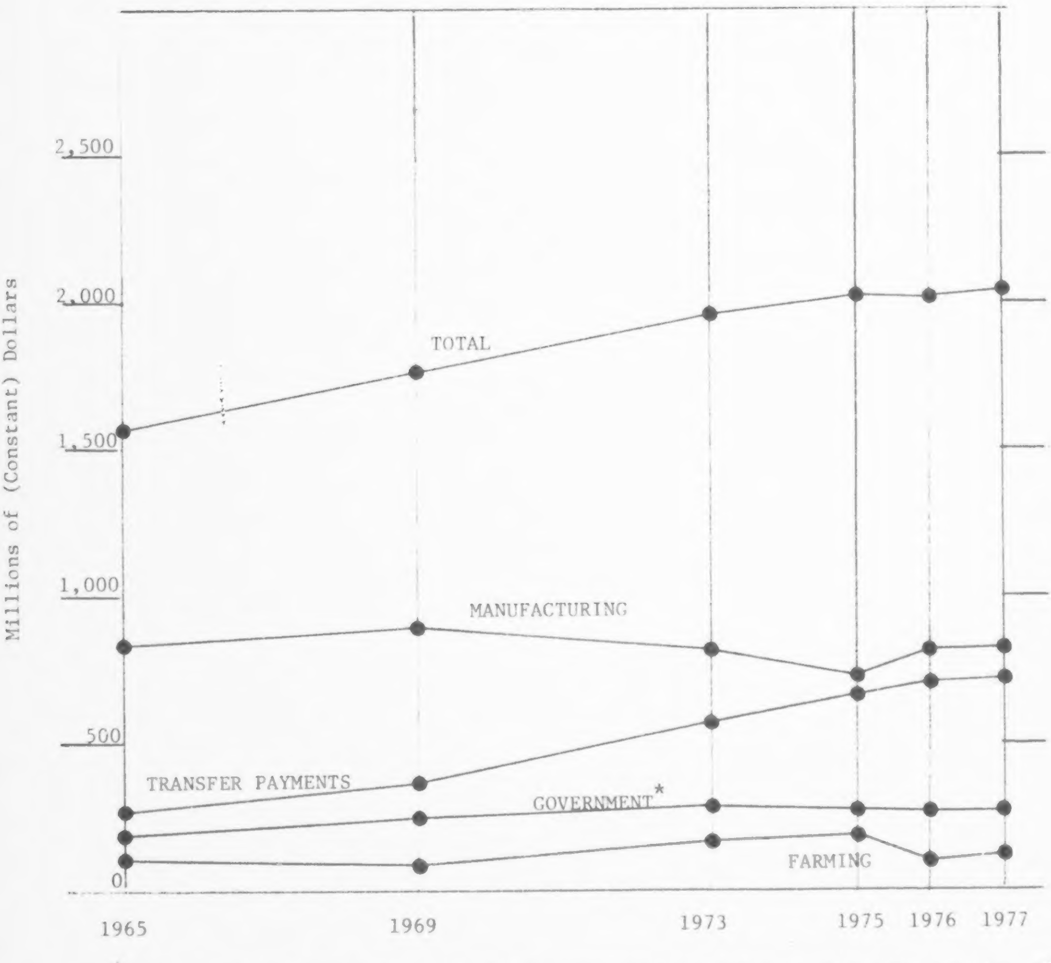
SOUTHWEST ILLINOIS

PERSONAL INCOME COMPONENTS OF THE ECONOMIC BASE, IN CONSTANT, 1977 DOLLARS



*The values indicated for asterisked components represent only that portion of total personal income from the component which is estimated to be income derived from outside the Region. See Introductory note, page 3.

In addition to the components shown above, Mining contributed about $60 million, and Transportation-Communication-Utilities* and Property Income* each contributed about $30 million to the economic base in 1977.

[*] The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

*The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

---

*Adjusted for changes in the U.S. Consumer Price Index.

**These figures are probably the result of a change in Illinois law (P.A. 78-240) which changed the tax on coal from the point of shipment (i.e. where the order was placed) to the point of extraction.
